Harley Hot Wax

How It Works

Harley's Hot Waxes contain a few surprises, extra strong grip, no skin drag and no sticky residue. Apply to smaller more sensitive areas to grip hair as short as 1mm.

Directions For Use

Break into smaller pieces. This can be done with a hammer or simply by dropping the wax onto a hard surface. Place wax into a wax heater at a medium heat setting, slowly turn up the wax heater while occasionally stirring the wax until you have a soft consistency. Do not overheat. Do not microwave.

Test the wax on the inside of your wrist to ensure it is at a comfortable temperature and again on the client's skin as a test patch. Meanwhile prepare the skin by cleansing with Harley Cleanser & Toner and then apply a very small amount of Harley Pre-Wax Oil. Using a spatula, apply wax evenly, first in the opposite direction of hair growth and then with the direction of hair growth in the same stroke, go past the start point to make a tab.

Once the wax has cooled and become slightly firm (not hard or brittle) flick up the tab. Gripping the tab with one hand and firmly holding the skin with the other, remove the wax in the opposite direction of the hair growth in one quick motion. Immediately apply firm pressure with your hand to soothe and reduce redness. After treatment, tweeze away any stubborn hairs and apply Harley After Wax Oil or Harley Wax Aloe Gel.

Ingredients

Rose Hot Wax

Glyceryl Rosinate, Colophonium, Cera Flava, Cera Alba, Paraffin, Lanolin, Titanium Dioxide, Parfum, Geraniol, Citronellol, CI 45410 (D&C Red 28), CI 26100 (D&C Red 17), CI 15850:1 (D&C Red 7)

Aloe Hot Wax

Glyceryl Rosinate, Colophonium, Cera Flava, Cera Alba, Paraffin, Lanolin, Parfum, Limonene, Cinnamal, Citral, Mica, CI 61565 (D&C Green 6)

Chocolate Hot Wax

Glyceryl Rosinate, Colophonium, Cera Flava, Cera Alba, Paraffin, Lanolin, Titanium Dioxide, Iron Oxides, CI 77266 (Carbon Black 2), Parfum

Lavender Hot Wax

Glyceryl Rosinate, Colophonium, Cera Flava, Cera Alba, Paraffin, Lanolin, Lavandula Angustifolia Oil, Linalool, CI 60725 (D&C Violet 2)

Summer Fruits Hot Wax

Glyceryl Rosinate, Colophonium, Cera Flava, Cera Alba, Paraffin, Lanolin, Mica, Parfum, Benzyl Benzoate, Lanolin, CI 45410 (D&C Red 28 Lake), CI 26100 (D&C Red 17), CI 15850 (D&C Red 7)

Harley Film Wax

How It Works

Harley Film Waxes combine the best qualities of our Harley Hot Wax and Harley Strip Wax ranges. With an extra strong grip, less skin drag and no sticky residue the Harley Film Wax range makes it the perfect wax for waxing both large and small areas.

Directions For Use

Place wax into a wax heater at a low heat setting, occasionally stir the wax while slowly turning up the wax heater until you have a soft honey like consistency. Test the wax on the inside of your wrist to ensure it is at a comfortable temperature. Then prepare the skin by using Harley Cleanser & Toner. Next, apply a thin layer of Harley Pre-Wax Oil with a cotton pad. Load your spatula and deposit the wax onto the skin then quickly spread the wax in the direction of the hair growth.

Once the wax has cooled and become slightly firm and not tacky, flick up a tab. Gripping the tab with one hand and firmly holding the skin with the other, remove the wax in the opposite direction of the hair growth in one quick motion and immediately apply firm pressure with your hand to soothe and reduce redness. After treatment, tweeze away any stubborn hairs and apply Harley After Wax Oil or Harley Wax Aloe Gel to reduce redness and soothe the skin.

Ingredients

Azulene Film Wax Beads

Colophonium, Cera Alba, Ethylene (VA Copolymer), Mica, Titanium Dioxide, Parfum, CI 61565 (D&C Green No.6), Azulene, Hexyl Cinnamal, Hydroxycitronella, Linalool

Lavender Film Wax Beads

Colophonium, Cera Alba, Ethylene (VA Copolymer), Lavandula Angustifolia, CI 60725 (D&C Violet No.2)

Summer Fruits Film Wax Beads

Glyceryl Rosinate, Colophonium, Cera Flava, Hydrogenated Palm Glycerides, Ethylene/VA Copolymer, Cera Microcrystallina, Benzyl Benzoate, Parfum, Mica, CI 73915

Harley Strip Wax

How It Works

Harley Strip Waxes have a superior grip that removes all the hairs and leaves the skin feeling smooth and refreshed. Apply a super thin layer to grip hair as short as 1mm. Used at low temperature it is perfect for legs, chest, back & arms.

Directions For Use

Remove lid and place pot in a wax heater at a medium heat setting, stir the wax and slowly turn up the wax heater until you have a soft consistency. Do not overheat.

Test the wax on the inside of your wrist to ensure it is at a comfortable temperature and again on the clients skin as a test patch. Meanwhile cleanse skin with Harley Cleanser & Toner. Using a spatula, spread a thin layer of warmed wax in the direction of the hair growth. Massage a waxing strip onto the waxed area and remove against the direction of the hair growth. After treatment, tweeze away any stubborn hairs and apply Harley After Wax Oil.

Wax should not be applied to broken or damaged skin. Use one of our Harley Hot Waxes for the smaller more intimate areas.

Ingredients

Gold Strip Wax

Glyceryl Rosinate, Paraffinum Liquidum, Mica, Parfum, Coumarin

Rose Strip Wax

Glyceryl Rosinate, Paraffinum Liquidum, Ricinus Communis (Castor) Seed Oil, Titanium Dioxide, Parfum, Geraniol, Citronellol, CI45410 (D&C Red 28 Lake), CI15850:1 (D&C Red 7), CI26100 (D&C Red 17)

Summer Fruits Strip Wax

Glyceryl Rosinate, Paraffinum Liquidum, Mica, Parfum, Benzyl Benzoate

Tea Tree Strip Wax

Glyceryl Rosinate, Paraffinum Liquidum, Titanium Dioxide, Melaleuca alternifolia leaf oil, CI47000 (D&C Yellow No. 11), CI61565 (D&C Green No. 6)

Ingrown Hair Solution

How It Works

By reducing the build-up of dead skin cells that can block pores and it soothes skin after waxing.

Directions For Use

Shake well before use. Spray onto your hand and gently rub into the affected area. Apply daily until irritations and bumps have cleared.

Ingredients

Aqua, Alcohol Denat, Glycerin, Polysorbate 20, Sodium Lactate, Salicylic Acid, Lactic Acid, Hamamelis Virginiana Bark/Leaf/Twig Extract, Panthenol, Ethylhexylglycerin, Allantoin, Disodium EDTA, Arnica Montana Flower Extract, Citric Acid, Phenoxyethanol

Pomegranate Sugar Scrub

How It Works

The Harley Pomegranate Body Scrub is an oil free sugar scrub suitable for the whole body. Use it to gently exfoliate and moisturise the body without leaving any oily residue. Perfect for use before and after a waxing treatment.

Directions For Use

Prior to your appointment, apply to wet skin, massaging it in to remove dead skin while in the shower/bath. When used after a waxing treatment it is recommended you allow 2-3 days before using the scrub.

Ingredients

Glycerin, Sucrose, Polysorbate 20, Aqua, Tocopherol, C13-14, Isoparaffin, Ethylhexylglycerin, Punica Granatum Fruit Extract, Laureth-7, Phenoxyethanol, Polyacrylamide, Potassium Sorbate, Sodium Benzoate, Parfum, Linalool, CI 14700, CI17200

Technical Information Instructions & Guidelines

Harley Cleanser & Toner

for use with Hot Wax, Strip Wax & Film Wax

How It Works

The Harley Wax Cleanser & Toner is an essential step in any waxing treatment. Acting in two stages the cleanser firstly emulsifies and removes dirt and oil embedded in the skin and secondly it rebalances the skins PH level, tightens the skin and pores and removes any oil or lotion to maximise your waxing results.

Directions For Use

Apply to the skin before a waxing treatment using a cotton pad. Allow the skin to dry before applying the Strip wax. For the best results use Pre-Waxing Oil before a Hot or Film Wax and finish the treatment with our Harley Wax After Care Oil or Aloe Gel.

Ingredients

Aqua, Isopropyl Alcohol, Alcohol Denat, Phenoxyethanol, Ethylhexylglycerin, Parfum, Anthemis Nobilis Flower Extract, Lavandula Angustifolia Flower Extract, Panax Ginseng Root Extract, Symphytum Officinale Root Extract, Hexyl Cinnamal, Hydroxycitronellal, Benzyl Alcohol, Butylphenyl Methylpropional, Linalool, Eugenol, Benzyl Benzoate, Benzyl Salicylate, Farnesol, Geraniol, Isoeugenol, Benzyl Cinnamate, Cinnamyl Alcohol, CI 19140, CI 42090

Harley Pre-Waxing Oil

for use with Hot Wax & Film Wax

How It Works

The Harley Wax Pre-Waxing Oil creates a lipid barrier between the Hot or Film Wax and the skin allowing the wax to remove hair while protecting the skin. As a result, the Harley Wax Pre-Waxing Oil reduces redness and allows for a more pleasant treatment.

Directions for Use

The Harley Wax Pre-Waxing Oil should only be used in conjunction with our Hot and Film Wax. Apply a thin layer to the skin using a cotton pad or simply massage the Harley Wax Pre-Waxing Oil directly into the skin. Use a tissue to remove excess oil.

Ingredients

Paraffinum Liquidum, Geraniol, Citronellol, Aloe Barbadensis, CI 61565 (D&C Green 6)

Harley After Wax Oil

for use with Hot Wax, Strip Wax & Film Wax

How It Works

The Harley After Wax Oil is an essential step in any waxing treatment. It reduces skin irritation, redness & lowers the possibility of ingrown hairs. The Harley After Wax Oil is made with extracts of tea tree and lavender. As tea tree is a natural antiseptic and lavender has calming properties it will leave your skin clean and smooth.

Directions For Use

Apply to the skin after a Hot Wax, Strip Wax or Film wax treatment using a cotton pad or simply massage the Harley After Wax Oil directly into the skin. For the best results use in conjunction with the entire Harley Wax range.

Ingredients

Paraffinum Liquidum, Lavandula Angustifolia, Melaleuca Alternifolia, Linalool, Limonene, CI26100

Aloe Soothing Gel

for use with Hot Wax, Strip Wax & Film Wax

How It Works

The Harley Wax Aloe Soothing Gel is an essential finish in any Harley Waxing treatment. It reduces skin irritation, redness & lowers the possibility of ingrown hairs by soothing the skin and helps heal any damaged tissues.

Directions For Use

Apply to the skin after a Hot, Film or Strip Wax treatment using a cotton pad or simply massage directly into the skin, this will clean and protect the area allowing the excited nerve endings to heal and soothe. For the best results use in conjunction with either the Harley Hot Wax, the Harley Strip Wax and Harley Film Wax system.

Ingredients

Aqua (Water), Glycerin, Carbomer, PEG-7, Glyceryl Cocoate, Aloe Barbadensis Leaf Juice, Propylene Glycol, Sodium Hydroxide, Methylparaben, Diazolidinyl Urea, Benzophenone-4, Disodium EDTA, Propylparaben, Soluble Collagen, Sodium Hyaluronate, Anthemis Nobilis Flower Oil, Linalool

Natural Wax Solvent

How It Works

The Harley Wax Natural Wax Solvent dissolves Hot Wax, Strip Wax and Film Wax from linen, clothes, equipment, carpets, floors and furniture. It works by breaking down the wax allowing it to be easily wiped off without causing any damage.

Directions For Use

Pour some natural wax solvent on to a clean dry cloth until damp. Hold the cloth to wax for a few seconds and allow the solvent to soak in. Gently rub around the area until area is clean. Use another dry cloth to dry the area.

Safety Information

Not suitable for contact with skin. Do not swallow. Harmful: May Cause lung damage if swallowed. Flammable: Do not expose to heated surfaces or naked flame. Irritating to the skin and eyes. Wash skin immediately with soap and cold water and flush eyes with cold water. Prevent from entering drains or water courses.

Ingredients

Orange Terpenes
